Education

B.Tech CSE (CGPA - 6.0), Manav Rachna University

Sept 2023 - Jun 2027

Experience

Codsoft Pvt. Ltd., Python Developer Intern

- Designed and developed Python-based backend systems, leveraging object-oriented programming and clean code practices.
- Created and integrated REST APIs using Flask, enabling efficient communication between client and server components.
- Processed and analyzed structured data using Pandas, optimizing data workflows and improving execution efficiency.
- Automated routine tasks through Python scripting, reducing manual effort and increasing overall productivity.
- Collaborated on debugging and performance tuning, ensuring robust and scalable application behavior.

Projects

Task Management System (Python)

- Developed a task management system to create, update, and track daily tasks efficiently.
- Implemented CRUD operations using Flask and integrated a database for persistent storage.
- Designed user-friendly interfaces for task prioritization and status tracking.
- Tech Stack:** Python, Flask, SQLite, HTML, CSS

File Organizer Automation Tool

- Built an automation tool to organize files into folders based on type, size, and date.
- Utilized Python libraries such as os and shutil for file handling and directory management.
- Reduced manual effort by automating repetitive file sorting tasks.
- Tech Stack:** Python, os, shutil

Student Result Analysis System

- Developed a system to analyze student performance and generate summary reports.
- Processed datasets using Pandas to calculate averages, grades, and performance trends.
- Visualized results using Matplotlib for better insights and decision-making.
- Tech Stack:** Python, Pandas, Matplotlib

Skills

Technical: C | C++ | JavaScript | Python

Web Technologies: HTML | CSS

Problem Solving: Data Structures and Algorithms

Developer Tools: VS Code | Git/Git hub

Certifications

Python Essential Training (LinkedIn Learning): Covered core Python concepts including syntax, data structures, functions, and practical programming applications.

Operating Systems Fundamentals (LinkedIn Learning): Learned process management, memory management, file systems, and core OS concepts.

Database Management Systems (LinkedIn Learning): Gained understanding of relational databases, SQL queries, normalization, and data modeling.

Computer Networks (LinkedIn Learning): Covered networking fundamentals including protocols, OSI model, TCP/IP, and network security basics.

Programming Foundations: Data Structures (LinkedIn Learning): Learned arrays, linked lists, stacks, queues, and their real-world applications.
